**TO WHOM IT MAY CONCERN**

**RE: ALLEGATION OF SEXUAL IMPROPRIETY**

The attention of College Management has been drawn to the events trending on social media '#UCH metoo' alleging some members of staff in the College of sexual impropriety.

We wish to inform and assure our stakeholders and the general public that College of Medicine and its parent University frown at such acts of impropriety and is therefore taking these allegations seriously. Accordingly the College Management is monitoring the event very closely and making effort to get concrete evidences that could be used to prove these allegations so that necessary action may be taken. In addition, College Management is strengthening already existing structures through which concerned/affected students may report these incidences confidentially and provide the evidence necessary to pursue the alleged case to a logical conclusion.

In the meantime, we solicit the cooperation and patience of all concerned while due process is followed in investigating these matters in order to protect the interests of all.

Thank you.

**Dr. Ikeoluwapo O. Moody**
