University of Ibadan

The First and Best

Our Vision

To be a world-class institution for academic excellence geared towards meeting societal needs.

Our Mission

- To expand the frontiers of knowledge through the provision of excellent conditions for learning and research.
- To produce graduates who are worthy in character and sound judgement.
- To contribute to the transformation of society through creativity and innovation.
- To serve as a dynamic custodian of society's salutary values and thus sustain its integrity.

The University Anthem (The Fount)

1. UNIBADAN, fountain head	2. UNIBADAN, first and best
Of true learning, deep and sound	Raise true minds for a noble cause:
Soothing spring for all who thirst	Social justice, equal chances
Bounds of knowledge to advance	Greatness won with honest toil
Pledge to serve our cherished goals	Guide our people this to know:
Self-reliance, Unity	Wisdom's best to service turned
That our nation may with pride.	Help enshrine the right to learn
Help to build a world that is truly free.	For a mind that knows is a mind that's free.

The College of Medicine Anthem

Ibadan College of Medicine
Heed the call
Nurturing, Raising hands for the cause
Training, bringing up to date
Knowledge for all
Through God our Creator, we learn to save
Sound out O bugle
Sound forth its fame
Bring out the glory of our Noble School
Ibadan College of Medicine
Heed the call
Centre of Excellence
The best of all

PRINCIPAL OFFICERS OF THE COLLEGE

PROVOST

Professor Olayinka O. Omigbodun

FAS, FNAMed, FAMedS.

MBBS (Ib), Dip.Psych (Manchester), MPH (Leeds), MD (NMC),

FMCPsych, FWACP.Psych.

DEPUTY PROVOST

Professor A.F. Adeniyi

B.Sc, M.Sc, Ph.D

SECRETARY TO THE COLLEGE

Dr. Ikeoluwapo O. Moody

B.Sc. (Ife), Dip. HRM, M.Sc., M.Ed., Ph.D

MAUA, MAA, ACIPM, MANUPA

FINANCIAL CONTROLLER

Oluwafolakemi O. Ajayi

B.Sc. (Acctg), MBA, FCA, MNIM

ACTING MEDICAL LIBRARIAN

Dr Grace Ajuwon

B.A, MLS, Ph.D

COURT OF GOVERNORS MEMBERSHIP 2020-2022

Pro-Chancellor & Chairman of the Court	- Chief John E.K. Odigie Oyegun
Acting Vice-Chancellor	- Professor A.B. Ekanola
Chairman, University College Hospital Board of Management	- Alhaji I.B.B. Shettima
Provost, College of Medicine	- Professor Olayinka O. Omigbodun
Chief Medical Director, University College Hospital	- Professor J.A. Otegbayo
Deputy Provost, College of Medicine	- Professor A.F. Adeniyi
Council Representatives	- Comrade Abba E. Yaro - Hon. Emeka Nwogbo
Senate Representative	- Professor M.O. Oyeyemi
Academic Board Representative	- Professor I.F. Adewole
Member Appointed by the Court of Governors	- Professor Emmanuel Otolorin
Representative of Federal Ministry of Education	- Mr. David Gende
Representative of Federal Ministry of Health	- Dr. Boladale B. Alonge
University College Hospital Board of Management Representative	- Professor Titus Ibekwe
Secretary to College	- Dr. Ikeoluwapo O. Moody
Financial Controller	- Mrs. Oluwafolakemi A. Ajayi

Court of Governors

STANDING COMMITTEES OF THE COURT OF GOVERNORS

1. Board of the Institute of Advanced Medical Research and Training

Membership

Provost – Chairman

Deputy Provost

Dean, Postgraduate School, University of Ibadan

Dean of Faculties in the College

The immediate past Provost of the College

Director of the Institute

Dean, Faculty of Science, University of Ibadan

The immediate past Director of the Institute

One Representative at Professional level from each of the Faculties

Director, National Institute for Medical Research or his representative

Director-General, Federal Ministry of Science and Technology or his representative

*Such persons not exceeding two in number, as may be appointed by the Board of the Institute

Deputy Registrar and Secretary to the College - Secretary

** Chief Medical Director, University College Hospital (UCH), Ibadan has been appointed as one of the two members for the time being.*

Terms of Reference

- (i) To make rules and regulations for the smooth-running of the Institute;
- (ii) To consider and report to the Court of Governors upon the

- buildings, premises, furniture and apparatus and other needs for carrying on the work of the Institute;
- (iii) To consider and report through the Academic Board to the Court of Governors upon all projects involving finance, accounts, investments, or the use or disposal of property;
 - (iv) To receive and approve or amend any proposals from the Director concerning research policies of the Institute and to give appropriate directions to the Director;
 - (v) To furnish the Court of Governors through the Academic Board with an annual report through the Academic Board with an annual report on the research activities and other information relating to any of the operators of the Institute.

2. Joint UI/UCH Capital Tenders Board

Membership

Chairman, University of Ibadan Council – Chairman

Chairman, University College Hospital Board of Management –
Deputy Chairman

Vice-Chancellor, University of Ibadan

Chief Medical Director

Two members of the University College Hospital Board of
Management

One council member of the Court of Governors

Chairman, Medical Advisory Committee, U.C.H.

Director of Administration, UCH – Secretary

Terms of Reference

To act as the Joint Tenders Board, on behalf of the council of the University of Ibadan and the Board of Management of the University College Hospital, in respect of all Capital projects being jointly financed by the University of Ibadan, College of Medicine and the University College Hospital, Ibadan

3. Appointments and Promotions Committee for Administrative and Technical Staff

Membership

Provost – Chairman

Registrar, University of Ibadan or his representative
Chief Medical Director, University College Hospital is
representative

Deputy Registrar and Secretary to the College

One Council Member on the Court

Medical Librarian

Financial Controller

Senate Representative on the Court

Academic Board Representative on the Court

Heads of Departments concerned

Principal Assistant Registrar (HR&D) – Secretary

Terms of Reference

To consider all appointments to and promotions within the Administrative and Professional staff except to the office of Secretary to the College provided always that the Provost shall have power to make temporary appointments to such posts for a period not exceeding one year.

4. Junior Staff Committee

Membership

Deputy Registrar and Secretary to the College – Chairman

Financial Controller

Medical Librarian

Two Representative from each Faculty

Principal Assistant Registrar (HR&D) – Secretary

Terms of Reference

To deal with matters relating to promotion, salaries and general conditions of service of all junior staff in the College.

OFFICERS OF FACULTIES AND THE INSTITUTES

Faculty of Basic Medical Sciences

Dean

Professor S. B. Olaleye

B.Sc., M.Sc., Ph.D (Ib), Dip. Theol.

2018 – 2022

Dean

Professor Oyeronke, A. Odunola

2022 – Till Date

B.Sc., M.Sc., Ph.D (Ibadan)

Sub-Dean (Postgraduate)

Dr. S. A. Onasanwo

B.Sc., M.Sc., Ph.D (Ib.)

Sub-Dean (Undergraduate)

Dr. Olufumilola B. Makanjuola

HISTORY OF UNIVERSITY OF IBADAN MEDICAL SCHOOL AND COLLEGE OF MEDICINE

The Faculty of Medicine was one of the first Faculties created when the University College, Ibadan came into being in 1948.

The fundamental problem which faced the Faculty in the early stages of its existence was that of maintaining high standards and securing worldwide recognition. The alignment of the Medical School in special relation with the University of London helped to attract the recognition of the General Medical Council of Great Britain. By this special relationship, medical students of the University College, Ibadan took courses in Medicine leading to the degrees of MBBS of the University of London.

In choosing a site for the University College, it had been decided that there should be only one campus on which all faculties should be built. The choice of Ibadan as the University town had the obvious drawback, in the early days as there was no hospital of high enough standard to be used as a teaching hospital. Pre-medical courses in Chemistry, Physics and Biology were, as they are, taught in the Faculty of Science. The pre-clinical departments teaching Anatomy and Physiology were housed in the Old Yaba Medical School in Lagos until 1950 when the dissection rooms and laboratories for these courses were built in Ibadan. Thus pre-clinical courses started, having been given recognition by London University in 1948.

In anticipation of the clinical training which would have to be given to the pre-clinical students who had started their courses, the College had to make plans for the running of a teaching hospital. In 1948, the College became responsible for the administration of Adeoyo Hospital, a hospital which had up till then been run by the City Council of Ibadan (the so called "Native Administration") and the Government-controlled Jericho Hospital. It was obvious from the beginning that the facilities in the two hospitals would not be adequate for the clinical training of medical students. The

Faculty, therefore, made alternative arrangements for the clinical training of its medical students who were sent overseas until clinical courses could start in a new teaching hospital.

The first projected scheme for a permanent hospital had been that a large 800-bed hospital should be built on a permanent site of the College. This was rejected as being too costly, and an alternative decision was taken in 1949, in which the University of London acquiesced that the temporary site of the College should be converted into a teaching hospital as soon as the other Faculties of the College moved to the new site. Until early in 1951 this decision governed policy and expectations. Meanwhile work was carried on at Yaba and at the Jericho and Adeoyo Hospitals on the assumption that the latter would serve for clinical training for a short period.

In August 1951, the Government assumed full and direct responsibility for the provision of an entirely new teaching hospital. Efforts were immediately made to implement this decision in the shortest time possible. A special Ad hoc Coordinating Committee, representing the interests of all the parties concerned with the projected new hospital, was formed in London in the autumn of 1951 by London University at the invitation of the College Council.

In February 1952, important discussions, attended by representatives of the College and directly affecting its policy in relation to the Faculty of Medicine, took place in London. At these discussions, it was decided that in the period required to plan, build and bring the projected new hospital into active operations, medical students should continue to go overseas for their clinical training, with the co-operation of Universities in Great Britain. Ninety-five students of the University College Ibadan qualified by this arrangement.

The first group of students who proceeded overseas for their clinical training in 1950 graduated in 1954. A number of students who had already advanced in their clinical training following courses given at Yaba, continued training under the College for the Diploma or Licentiate of Medicine and Surgery, entitling them to practice in Nigeria. Arrangements were made for them and for other former Yaba graduates to study, if they

wished, for the Conjoint Board in London to obtain a qualification registrable with the General Medical Council, and the majority who did so qualified as the years passed.

A new 500-bed hospital, some four miles from the University College Ibadan, was planned. In this circumstance, every effort was made to complete the new hospital and to provide adequate staffing and facilities by 1956. The choice of the site was dictated by the practical need to make it easily accessible to the people of Ibadan.

With the statutory establishment of a Board of Management (on which the Faculty was represented), the first meeting was held in June 1953 and the scheme progressed more rapidly than was expected. Clinical teaching at Ibadan commenced on 7th October, 1957, the same year in which the University Teaching Hospital, built partly for the purpose of training of medical personnel locally, was formally opened. The Hospital was opened by the Princess Royal specifically on 20th November, 1957, and in 1960, the first thirteen medical graduates wholly trained in Ibadan, became qualified.

Between 1960 and 1966, 251 more graduates qualified at the Ibadan Medical School, although their certificates bear the "MBBS Degree of the University of London". However, since 1968 to date, 8,296 more graduands have qualified and received the degree of MBBS (Ibadan); in the same vein the school had trained 1,440 Nursing graduates since 1968, 885 Physiotherapy graduates since 1969, 880 BDS graduates since 1980, 898 Human Nutrition graduates since 1982, as well as 1,253 Biochemistry and 685 Physiology graduates since 1968.

Several among these products of Ibadan are today on the teaching staff of other medical schools in Nigeria and institutions training health professionals globally. In fact, the unrivalled contribution of the Ibadan Medical College to the training of health personnel in Nigeria is underlined by the fact that today one out of every six Nigerian doctors, and two out of every five Physiotherapists are products of the College.

In December 1962, the Federal Parliament passed a bill for an Act to establish the University of Ibadan. On 27th of December, 1962, when the Governor-General gave his assent to the Bill, the University became an

autonomous institution, and the Medical School curriculum was then changed so that our medical students would be trained better for the Nigerian environment in which they would practice. After twelve years, the curriculum was further revised to remove most of the previous drawbacks. The current curriculum came into operation in the 2009-2010 Academic session.

The demand for places in the medical school has been great and the standard of entrants accepted by the University is high. For several sessions running and due to limited facilities, the College has not been able to offer admission to more than one in twenty of the available qualified applicants.

Evolution of the College of Medicine

Medicine has been the flagship discipline of the University of Ibadan since its inception. Evidence for this has been provided earlier that the ability of the town, Ibadan, to provide the number and variety of cases needed by the premier medical school in West Africa that was to be charged with training African doctors for Africa contributed to its being selected over rival cities. This was because, at the time of establishing the University, little was known about the epidemiology of diseases amongst Africans as orthodox medical care was largely unavailable to the native population. What little care was given was provided by the few General Hospitals for indigenes, natives and missionary health centres (such as Baptist Medical Centre, Ogbomoso), and even fewer private (UK-trained) practitioners (essentially in other big cities) such as Sir Kofu Abayomi (in Lagos), and Dr. Anthony S. Agbaje (in Ibadan). Of necessity, these facilities simply provided what care they could and did little or no training, and definitely no research. The Ibadan Medical School was therefore established to carry out both research and training in the medical sciences, as well as provide tertiary care to the standard that was available in the United Kingdom, and to do so for the whole of West Africa. It was for this reason that the training of medical assistants at the Yaba Medical College was considered inadequate for the new purpose.

The determination of the founders to achieve their plans for the Medical School was graphically exercised in their advertisement of seven out of the

first twelve professorships for UCI in 1947 in the following areas–Surgery, Medicine, Public Health, Pathology, Physiology, Anatomy and Gynaecology–along with others in English, History, Zoology, Botany and Geography. In keeping with this, the first senior academic appointment to be made by the University (after the appointment of Dr Mellanby as Principal) was that of Professor Beatrice Joly in March 1948 as the foundation Head of the Department of Surgery and Dean of the Faculty of Medicine. Furthermore, senior appointments were added quickly and by 1949, the five foundation Professors in the departments considered most essential to the commencement of the Medical School, and thus indicative of its primary academic orientation, were on ground. These were, in order of appointment, John Parsons (Physiology; September 1948), Alexander Brown (Medicine; October 1948), Oladele Ajose (Preventive and Social Medicine; later 1948, after Professor Brown) and Alastair Smith (Anatomy; October 1949). Professor Oladele Ajose had the distinction of being the first African Professor, not just of his discipline but of any discipline, to be appointed by the University. Beside the appointment of these professors, the University spared no expense in establishing an excellent Faculty of Medicine by appointing a large number of academic and non-academic staff and acquiring the facilities required for such an institution. Furthermore, there were important early collaborative efforts between the medical academic staff and their colleagues in other Faculties such as Science, Agriculture and Veterinary Medicine. This expanded the pool of intellectual input into all the faculties and resulted in many major advances in science and learning across board. Indeed, such has been the commitment of Ibadan to its Medical School that it (the School, and her successor College) has always been responsible for one-third of the University both in terms of staff and facilities, since the establishment of the institution till date. Indeed, the Neurosciences was one of the three areas of excellence selected by Kenneth Dike.

It is also worthy of note that the Faculty of Medicine was the first to start postgraduate training. It achieved this distinction by admitting the first postgraduate student of the University into the Department of Surgery on

20th November 1948 (just 9 months after the formal opening of the University), which interview Dr. Mellanby personally attended. This act was predictive of the Medical School's future commitment to, and success in, the advancement of science and learning. In the 1977/78 session, the then Federal Military Government designated our Faculty of Medicine as a Centre of Excellence in Medicine amongst Nigerian Universities. Senate and Council of the University of Ibadan warmly welcomed this designation and requested the Faculty to put up proposals which would enhance and promote its evolution into the status of a College of Medicine. These proposals were approved, in principle, by both Senate and Council and forwarded to the National Universities Commission (NUC). The NUC subsequently communicated its approval to the University, following which the Development Committee of Senate and its Finance Sub-Committee worked out the financial implications involved in the new administrative structure.

Conscious of the need to facilitate and consolidate the development of our Centre of Excellence and realising that the administrative structure and constraints of Faculty status would not foster the rapid development of essential national medical objectives expected of the largest and oldest Medical School in Nigeria, Council of the University of Ibadan took decisive steps to restructure the Faculty of Medicine into a College of Medicine with effect from 1st of August 1980. In accordance with the power conferred on the Council under the University of Ibadan Act section 4, Subsections 2 and 3, Council, at its meeting of Saturday 21 June, 1980 approved the regulations establishing the College and appointed Professor E. Oluwole Akande, the then Dean of the Faculty of Medicine, as the first Provost of the College.

The Senate Committee set up to review the regulations establishing the College came up with well-articulated objectives of a collegiate system to guide faculties or combinations of faculties intending to adopt the system in the future. These objectives, subsequently approved by Senate, were stated as follows:

- (a) The adoption of a collegiate system for the whole or part of the University should be seen as a device for achieving effective

- decentralisation of operations, devolution of powers and delegation of authority and responsibility.
- (b) The system should also be seen as a mechanism for eventually minimising the input of resources into and accelerating the process of decision-making and implementation.
 - (c) The system should be used to facilitate the enhancement of the image of the University of Ibadan as a centre of excellence by providing a well-articulated institutional framework for the vigorous pursuit of the academic objectives of the University,
 - (d) The system should further be seen as a means for achieving much greater co-ordination and cross-fertilisation of related disciplines.
 - (e) The system should be a major aid for the better assessment of resource requirements of the University and the resultant output.
 - (f) The system should be used as a device for coping with the current and anticipated expansion of the scale of operations of the University without compromising the quality of its output.
 - (g) Although the establishment of the College may lead initially to the creation of new offices, this should not be seen as an end in itself but as a necessary means for the eventual attainment of effective decentralisation, devolution of powers and delegation of functions and responsibilities.

In accordance with the regulations governing the College of Medicine, two foundation faculties, namely Faculty of Basic Medical Sciences and Pharmacy, and Faculty of Clinical Sciences and Dentistry, each headed by a Dean, as well as a Postgraduate Institute for Medical Research and Training, headed by a Director, were established.

At the beginning of the 1982/83 session, Senate approved the establishment of a Faculty of Pharmacy within the College with effect from 01 August, 1983. The following Departments were administratively within the new Faculty:

- (i) Department of Pharmaceutical Chemistry
- (ii) Department of Pharmaceutical Microbiology and Clinical

Pharmacy

- (iii) Department of Pharmaceutics and Industrial Pharmacy.
- (iv) Department of Pharmacognosy.

However, the Faculty of Pharmacy became autonomous with effect from 02 October, 2002. In December 2001, the Faculty of Public Health was created, comprising the three sub-departments that had earlier been created from the Department of Preventive and Social Medicine. The Department of Human Nutrition, which had hitherto been in the Faculty of Basic Medical Sciences, was transferred to the new Faculty. In March 2002, the Faculty of Dentistry was created out of the Faculty of Clinical Sciences and Dentistry which was the largest faculty in the University prior to the division.

UNIVERSITY OF IBADAN ACT 1962

(1962 No.37)

College of Medicine of the University of Ibadan Statute University of Ibadan Statute No. 2 Commencement: See Paragraph 14

In the exercise of the powers conferred by section 4(3) of the University of Ibadan Act 1962, and of all other powers enabling it in that behalf, the Council of the University of Ibadan has made the following statute:-

1. College of Medicine

- (1) There is hereby established as an integral part of the University, a College to be known as the College of Medicine of the University of Ibadan (hereinafter in this Statute referred to as “the College”) which shall be a body corporate with perpetual succession and a common seal and power to sue and be sued in its corporate name.
- (2) Without prejudice to the provisions of subsection (2) or section 1 of the University of Ibadan Act 1962, the College shall:-
 - (a) Provide courses of instruction leading to the award of degrees, diplomas, certificates and other university distinction in the medical and such allied professions as the Council may prescribe;
 - (b) Provide special training courses, whether leading to university distinctions or not, for such persons as the Council may prescribe taking into account at all times the requirements of the Federal Ministry of Health.
 - (c) Conduct research, with particular reference to research in the field of medical science; and
 - (d) Arrange conferences, seminars, study groups and other similar activities in the field of medical science,

- (3) Subject to the provisions of the University of Ibadan Act 1962, as amended by the University of Ibadan (Amendment) Act 1972 and the University of Ibadan (Amendment) Act 1976, (relating to the functions of the Visitor, the Council, the Senate and the Vice-Chancellor), the College shall:
 - (a) as respects academic matters, be responsible to the Senate;
 - (b) as respects non-academic matters, be subject to the overall control of the Council; and
 - (c) As respects its financial affairs, be self-accounting but responsible through the Vice-Chancellor to the Council.

2. Provost

- (1) There shall be a Provost of the College who shall be the Chief Executive Officer of the College and shall be responsible to the Vice-Chancellor for the day-to-day running of the College.
- (2) The Provost shall be appointed by the Council from amongst the Professors in the College, after the consideration of any recommendations made in that regard by the Academic Staff Assembly of the College, after election by the Assembly at a duly constituted Meeting of the Assembly at which the election of the Provost is on the agenda.
- (3) The Provost shall in relation to the University, take precedence before all Deans of Faculties in the University.
- (4) The Provost shall hold office for one single term of four years beginning from the 1st day of August of the year in which she/he is appointed and shall thereafter not be eligible for reappointment until not less than four years have elapsed since she/he last held such office.
- (5) No person shall while holding the post of Provost, shall also be the Dean of a Faculty or Head of any Department of the College.
- (6) A meeting of the Academic Staff Assembly for the election of a Provost shall be held in the month of May or June immediately preceding the expiration of the term of office of an incumbent and

the Vice-Chancellor or the nominee shall preside over such meeting.

- (7) Without prejudice to the foregoing provisions of this paragraph, Professor Ebenezer Oluwole Akande shall be the first Provost of the College and shall be deemed to have been appointed in accordance with the provisions of sub-paragraph (2) of this paragraph with effect from 1st August, 1980 and shall vacate office in accordance with the provisions of sub-paragraph (4) of this paragraph.

3. Deputy Provost

- (1) There shall be a Deputy Provost of the College who shall assist the Provost and act in his/her place when the office of the Provost is vacant or the Provost is for any reason (including absence from the premises of the College) unable to perform his functions as the Provost.
- (2) The Provost shall nominate two (2) professors one of whom will be elected Deputy Provost by the Academic Staff Assembly.
- (3) The Deputy Provost shall be appointed by the Council from amongst the Professors in the College after consideration of any recommendation in that regard made by the Academic Staff Assembly after election by the Assembly at a duly constituted meeting of the Assembly at which the election of the Deputy Provost is on agenda.
- (4) The Deputy Provost shall hold office for two years beginning with the 1st of August of the year in which he/she is appointed and shall be eligible for re-appointment for a second term of two years.
- (5) A person who has held office as Deputy Provost for a continuous period of four years shall not be eligible for appointment as Deputy Provost until four years have elapsed since she/he last held such office.
- (6) No person shall, while holding office as Deputy Provost of the College also be the holder of the office of the Dean of a Faculty or Head of any Department in the College.

- (7) A meeting of the Academic Staff Assembly for the election of Deputy Provost shall be held in the month of May or June immediately preceding the expiration of the term of office of the current Deputy Provost; and the Vice-chancellor or the nominee shall preside over such meeting.
- (8) Without prejudice to the foregoing provisions of this paragraph, Professor Julius Babasola Familusi shall be the first Deputy Provost of the College and shall be deemed to have been appointed in accordance with the provisions of sub-paragraph (2) of this paragraph with effect from 1st August 1980 and shall vacate office in accordance with the provisions of sub-paragraph (4) of this paragraph.

4. Faculties

- (1) Without prejudice to the generality of the provisions of subsection (5) of the University of Ibadan Act 1962, the College shall consist of Faculties and Institutes which shall be made up of Departments and other academic units established in accordance with procedure prescribed by the Senate for the creation of new faculties and other academic units of the University.
- (2) The following two faculties shall constitute the foundation faculties of the College, that is
 - (a) the Faculty of Basic Medical Sciences and Pharmacy; and
 - (b) the Faculty of Clinical Sciences and Dentistry
- (3) One of the Professors assigned to each faculty shall be appointed by the Senate as the Dean of the Faculty after election by the Board of the Faculty, and shall hold office for a period of two years beginning with the 1st day of August of the year in which he/she is appointed, and shall be eligible for re-election for a second term of two years.
- (4) A person who has held office for a continuous period of four years shall not be eligible for election as Dean during the four years immediately following the end of that period.

5. Board of the Faculty

- (1) There shall be an established Board for each Faculty of the College (in this Statute hereinafter referred to as “the Board”)
- (2) The Board shall consist of
 - (a) The Vice-Chancellor and the Deputy Vice-Chancellor;
 - (b) The Provost and the Deputy Provost;
 - (c) The Dean of the Faculty
 - (d) All the academic staff of the Faculty;
 - (e) The Medical Librarian and
 - (f) Such other persons, not exceeding four (whether or not members of the University) as the Board may, with the specific or general approval of the Senate, appoint.
- (3) The quorum for any meeting of the Board shall be twenty or one third of the entire members of the Board for the time being whichever is the lesser, and subject to the provisions of subparagraphs (5) and (6) of this paragraph and any special or general directive of the Council, the Board may regulate its own procedure
- (4) The Board shall
 - (a) advise and report to the Academic Board on all matters relating to the organization of education, teaching and research in the subjects of the Faculty, including the development and review of curricula and the conduct of examinations;
 - (b) consider the progress and conduct of students in each teaching unit within the College and report thereon to the Academic Board;
 - (c) recommend to the Academic Board persons for appointment as examiners; and
 - (d) deal with such other academic matters as may be referred to it by the Academic Board
- (5) The Dean shall be the Chairman at all meetings of the Faculty Board when present, and when not present, such other member of the

Board as may be acting for the Dean for the time being, shall preside at the meeting.

- (6) It shall be the function of the Dean to present to Congregation for conferment of degrees, persons who have qualified for the award of degrees, diplomas, certificates and other academic qualifications of the College at examinations held in the branches of learning for which responsibility is allocated to that Faculty.

6. Court of Governors of the College

- (1) There shall be a Court of Governors of the College of Medicine (hereinafter in this Statute referred to as “the Court”) which shall be subject to the overall control of the Council of the University.
- (2) The Court shall:
 - (a) control the property and expenditure of the College
 - (b) submit to the University Council through the Vice-Chancellor any financial proposals relating to the College;
 - (c) employ on such terms and conditions within the framework of the conditions of service governing the appointment of non-academic staff in the University, such non-academic staff as appear to the Court to be necessary; and
 - (d) perform such other functions of the Council as the Council may from time to time delegate to it.
- (3) The court shall consist of:
 - (a) the Pro-Chancellor and Chairman of the Council, as Chairman of the Court;
 - (b) the Vice-Chancellor and Deputy Vice-Chancellor (Academic);
 - (c) the Chairman of the Board of Management of the University College Hospital;
 - (d) the Provost and the Deputy Provost;
 - (e) two members, who are not members of the academic staff

- of the University appointed by the Council;
- (f) one member, who is not a member of the College appointed by the Senate;
 - (g) one member, who is a member of the academic staff of the College, appointed by the Academic Board;
 - (h) two members appointed by the Board of Management of the University College Hospital;
 - (i) not more than two persons (whether or not members of the University) to be appointed by the Court;
 - (j) the Permanent Secretary in the Federal Ministry charged with responsibility for matters relating to health, or the representative; and
 - (k) the Permanent Secretary in the Federal Ministry charged with responsibility for matters relating to the University education, or the representative.
- (4) The quorum of the Court shall be six or one-third of the entire members for the time being, whichever is the lesser.
- (5) Members of the Court appointed under sub-paragraphs I to (i) of sub-paragraph (3) above shall hold office for such period, not exceeding four years as the Court may determine. Provided that the persons appointed under sub-paragraph (i) of paragraph (3) hereof shall cease to be members at the expiration of the tenure of office of the Court that appointed them.
- (6) A member whose term of office has expired shall be eligible for re-appointment for one further
- (7) The Court may, subject to any special or general direction of the Council, regulate its own procedure.

7. The Secretary

- (1) There shall be a Secretary to the College who shall, under the general control of the Registrar of the University, be responsible to the Provost for the day to day administration of the affairs (other than the financial affairs) of the College.

- (2) The Secretary shall be appointed on behalf of the Council by the Court and shall hold office for such period and on such terms relating to the emoluments of the office and otherwise as may be specified in the letter of appointment.
- (3) The person holding the office of the Secretary shall; by virtue of that office, be the Secretary to the Court, the Academic Board, and the Academic Staff Assembly.

8. Financial Controller

- (1) There shall be a Financial Controller who shall; under the general control of the University Bursar, be responsible to the Provost for the day to day administration of the financial affairs of the college.
- (2) The Financial Controller shall be appointed on behalf of the Council by the Court and shall hold office and otherwise as may be specified in the letter of appointment.

9. Academic Board

- (1) There shall be an Academic Board of the College which shall have control of the Academic affairs of the College and shall be responsible and subject to the control of the Senate in all academic matters.
- (2) The Academic Board of the College shall consist of:
 - (a) the Vice-Chancellor and the Deputy Vice-Chancellor (Academic),
 - (b) the Provost and the Deputy Provost
 - (c) the Professors in the College
 - (d) the Medical Librarian of the College
 - (e) the persons for the time being holding such appointments on the staff of the College as the Provost may, with the approval of the Vice-Chancellor, specify.
 - (f) such number of academic staff not exceeding one-third of the total number of the members of the Board, as the Academic Staff Assembly may, from amongst the

academic staff of the College, elect.

- (3) The quorum of the Academic Board shall be twenty or one-third of the total number of members for the meantime, whichever is the lesser.
- (4) The Provost shall be the Chairman at all meetings of the Academic Board of the College when present and when not present, the Deputy Provost, or where both of them are absent, one of the Deans of any of the Faculties of the College, as may be mandated by the Provost, shall be chairman of that particular meeting.
- (5) Any elected member may, by notice in writing to the Academic Board, resign the membership.
- (6) The procedure for electing members under sub-paragraph 9 (2) (f) above, shall be determined by the Board, and the member so elected shall hold office for a period of two years beginning with the 1st day of August in the year of the election and shall be eligible for re-election under this paragraph in the year in which the period of office expires, so however that no person shall be such a candidate if at the end of the current period of office, she/he would have held office as an elected member of the Board for a continuous period of six years or would have so held such office if she/he had not resigned.

10. Institute for Advanced Medical Research and Training

- (1) There shall be established as a constituent part of the College, an institute to be known as the Institute for Advanced Medical Research and Training which shall be charged with responsibility for:
 - (a) conducting relevant research into the health problems of the country; and
 - (b) the training of postgraduate students registered for higher degrees in medical and allied professions of the University.

- (2) The Institute shall function under the direction of a Board and a Director to be appointed by the Board of the Institute from among the professors in the College.
- (3) The Director of the Institute shall hold office for a period of three years in the first instance, and shall be eligible for appointment for another term of three years.
- (4) The Board of the Institute for Advanced Medical Research and Training shall consist of:
 - (a) the Provost
 - (b) the Provost of the Postgraduate College of the University
 - (c) the Deputy Provost;
 - (d) the Deans of the Faculties in the College
 - (e) the immediate past Provost of the College
 - (f) the Dean of the Faculty of Science of the University;
 - (g) the Director of Institute;
 - (h) the immediate past Director of the Institute;
 - (i) one representative at professorial level from each of the Faculties in the College;
 - (j) the Director, Nigerian Institute of Medical Research or the representative.
 - (k) The Permanent Secretary of the Federal Ministry charged with responsibility for matters relating to science and technology;
 - (l) Not more than two other persons appointed by the Board of the Institute.
- (5) The Provost shall be the chairman at all meetings of the Board when present, and when not present, the Deputy Provost, or where both are absent, one of the Deans of the Faculties in the College as may be mandated by the Provost, shall be the chairman at that meeting.
- (6) The Board of the Institute shall:
 - (a) give general and specific directions relating to the administration of the Institute;
 - (b) consider any matter relating to the building, premises,

- furniture, apparatus and other needs for carrying out the work of the Institute and report thereon to the Court;
- (c) consider all projects including finance and the use or disposal of property of the Institute and report thereon to the Court;
 - (d) receive and approve (with or without amendment) any proposals from the Director, concerning the research policies of the Institute and give appropriate direction to the Director.
 - (e) Furnish the Court through the Academic Board an annual report on the activities and other functions of the Institute.
- (7) The quorum for any meeting of the Board of the Institute shall be five.

11. Academic Staff Assembly

- (1) There shall be an Academic Staff Assembly of the College which shall consist of all full-time academic staff of the College.
- (2) The quorum for any meeting of the Assembly shall be fifty
- (3) The functions of the Academic Staff Assembly shall be:
 - (a) to elect representatives of the academic staff to the Academic Board;
 - (b) to elect representatives to the various bodies on which the academic staff of the College is specifically required (whether under the Statute or otherwise) to be represented; and
 - (c) to perform such other functions as the Academic Board may from time to time delegate to it;
- (4) The Provost shall be the chairman at all meetings of the Academic Staff Assembly when present, and when not present, the Deputy Provost, or when both are absent, one of the Deans of the faculties within the College as may be mandated by the Provost, shall be the chairman of that meeting.

12. Representation of the College on the Council, Senate and Statutory Bodies of the University

- (1) The Provost shall be a member of the Council, the Senate and all Committees of the University of which the Vice-Chancellor and Deputy Vice-Chancellors are statutory members.
- (2) All the Faculties in the College shall be represented by the Deans in charge thereof in all University Committees requiring the membership of Deans of Faculties.

13. Interpretation

- (1) Any work or expression used in this Statute shall have the same meaning as defined in the University of Ibadan Act 1962, as amended.
- (2) Without prejudice to the generality of the provisions of paragraph (1) above, in this Statute, unless the context otherwise requires. “The Assembly” means the Academic Staff Assembly of the College set up under paragraph 11 of this Statute; “The Court” means the Court of Governors of the College set up under the paragraph 6 thereof;

“Faculty Board” means the Faculty Board of Studies of the College set up under paragraph 5 of this Statute;

“The Institute” means the Institute for Advanced Medical Research and Training of the College of Medicine set up under paragraph (1) of this Statute; “Provost” and “Deputy Provost” mean employees of the College by that name respectively appointed under paragraphs 2 and 3 of this Statute.

14. Citation and Commencement

This Statute may be cited as the College of Medicine of the University of Ibadan Statute (Statute No. 2) and shall come into effect immediately on confirmation by the Minister of Education, Made at

Ibadan this 18th day of June, 1984.

CHIEF I. EKANEM-ITA, *Registrar and Secretary of the Council of the University of Ibadan*

CONFIRMED by the Minister of Education this 25th day of June, 1984

ALHAJI Y. ABDULLAHI, *Minister of Education*,

NOTE:

Senate has delegated the following of its functions to the Academic Board:

(I) *Section 5(2) (b) of the 1962 Act*

“the appointment and promotion of teachers (up to the level of Senior Lecturer)”

To organise the ceremonies of welcome to the Medical and Dental professions and the Induction to all Professional programmes in the College.

RESPONSIBILITIES OF PROVOST, DEANS AND HEADS OF DEPARTMENTS IN THE COLLEGE

A. Provost

1. The Provost shall be the Head of the College and shall be responsible to the Vice-Chancellor for the organisation and conduct of teaching and research in the College. She/He shall serve as a member of the Senate and be Chairman of the Academic Board of the College and such examining bodies as may be necessary. She/He will take part in the general administration and discipline of the University.
2. The Provost shall be responsible for the day-to-day administration of the College
3. The Provost shall approve applications for leave of absence for College staff (for more than three days and less than one month) on the recommendation of Head of Department provided the application does not involve the University in any financial expense.

B. Deputy Provost

The Deputy Provost shall perform such duties as the Provost may from time to time delegate to him/her apart from acting for the Provost when the latter is absent from College/University or is for any reason unable to perform the functions of his/her office.

C. Deans of Faculties

1. The Dean of the Faculty shall be the Chairman at all meetings of the Board of the Faculty when she / he is present.
2. The Dean of the Faculty shall be responsible to the Provost of the College for the smooth running of the academic and administrative

- work of the Faculty and in particular she / he shall correspond with the Provost and/or the secretary to the College on all matters relating to the appointment, promotion, confirmation and discipline of academic and senior administrative /technical staff of his/her Faculty after due consultation with the Head of Department.
3. She/He shall collate, co-ordinate, and present the budget and other proposals of the Faculty after consultations with the Heads of Departments.
 4. She/He shall be responsible for presenting to the Provost all papers arising from the meeting of the Board of the Faculty or its Committees for consideration of the Academic Board.
 5. She/He shall consider all applications for all types of research and travel grants submitted to him/her by the Head of Departments and forward them.
 6. She/He shall be responsible for the maintenance of the Faculty's buildings and their surroundings and all Departmental laboratories.
 7. She/He shall be a member of Appointments and Promotions Committee of the College and shall represent the Faculty in the meetings of the Appointments and Promotions Committee of the University.
 8. She / He shall represent the Faculty on the Development Committee of the College.

D. Heads of Departments

The Heads of Departments shall be responsible, through the Dean, to the Provost for the smooth running of the Department. In particular she / he shall:

1. Make arrangements for the teaching and examining of all courses and co-ordinate research programmes in the Department.
2. Make budgetary and other proposals for the needs of the department to the Dean, and operate the budget approved for the

Department;

3. Represent the Department at the interview, assessment, appointment and promotion of staff for the Department;
4. Make recommendations through the Dean to the Provost for the appointment, confirmation, promotion and discipline of academic and other categories of staff in the Department.
5. Consider directly with the Provost, Secretary to the College, Financial Controller and other Senior College officials matters affecting the department other than (4) above;
6. Scrutinise, in the first instance, applications for all types of research and travel grants by members of the staff and forward the recommendations to the Dean of the Faculty who shall present them to the Provost for necessary action;
7. Consider in the first instance, all applications for study leave and forward them with comments to the Dean of Faculty for necessary action; and
8. Be responsible for the maintenance of Departmental Laboratories, Offices, Workshops and Stores.

E. **Appointment to Headship of Departments and Research Institutes**

The Vice-Chancellor shall appoint the Head of a Department on the recommendation of the Provost who will make such recommendation after consultation with the Dean of the Faculty. The appointment of Heads of Departments shall be in accordance with the following rules:

1. (a) Eligibility
- (i) To be eligible for appointment as Head of Department or Director of an Institute, the member of staff must be a full Professor or an Arts Director in the Department/the Institute concerned, and must normally be holding a permanent appointment. Contract officers are not normally

eligible for appointment as Heads of Departments, except in special circumstances.

- (ii) Where there are no teaching staff of the rank of Senior Lecturer and above in a Department, the Vice-chancellor shall appoint a Coordinator on the recommendation of the Dean of the Faculty. The Coordinator shall be under the general supervision of the Dean of the Faculty who shall act as Head of Department.

(b) Appointment of Head of Department

In appointing a Head of Department, the following combinations of event shall be observed:

- i. When, in the Department, there is one Professor who has indicated interest in the position, that Professor shall be appointed as Head of Department provided that the Professor secures a majority of 'Yes' votes over 'No' votes from among members of the academic staff of the Department.
- ii. Where there are two or more Professors who have indicated interest in the position, there shall be an election among them and the candidate with majority of the votes shall be responsible.
- iii. Where there are no Professors or interested Professors in the Department the same provisions in (i) and (ii) of this clause above shall apply to Readers.
- iv. Where there are no Professors/Readers or interested Professors/Readers, the same provisions in (i) and (ii) of this clause above shall apply to Senior Lecturers.
- v. These processes outlined in (i-iv) of this clause above shall be observed at the expiration of the tenure of an incumbent Head/Ag. Head of Department.
- vi. At any election to validate or elect a Head/Ag. Head of Department, voting shall be by secret ballot.

- vii. The selection process shall follow the template as approved by Senate.
- viii. The selection process shall involve all academic members of staff of the Department. The Dean of the Faculty shall be the chairman, who shall only have a casting vote in the event of a tie between candidates.
- ix. The Faculty Officer shall be the returning officer.

(c) Other criteria for appointing Provost, Deans, Directors, and Heads of Department/Unit

The following criteria shall also be considered in appointing Provost, Deans, Directors and Heads of Departments/Unit:

A. The candidates shall:

- (i) Express willingness to serve;
- (ii) Submit vision and mission statement for improving the relevant academic unit;
- (iii) Agree that performance be appraised and evaluated as stated in Staff Information Hand Book 4.8 (c) and (d); and
- (iv) Agree to use the relevant Committees for decision-making in all academic, administrative and financial matters.

B. The candidate shall possess the following qualities:

- i. Be an accomplished scholar and/or seasoned professional in the discipline and be able to command the respect of colleagues.
- ii. Have a clear vision and capacity to co-ordinate and lead other members towards accomplishing set goals.
- iii. Have positive qualities that can stimulate diligence and commitment in colleagues and other members of staff.
- iv. Have effective external contacts, which can be appropriately tapped to the benefit of the Unit and its individual members.

v. Have the capacity to mentor the younger colleagues or students.

(d) Tenure

(i) The tenure of office of Head of Department shall be two years in the first instance and may be renewed by election for another two years subject to E.1.a.i (above). A Professor who has served two terms consecutively shall only be eligible for election after a break of two years.

(ii) The tenure of Acting Headship shall be two years and no more.

(iii) If a Head of Department or an Acting Head of Department wishes to relinquish the appointment, the person shall normally give 3 months' notice to that effect.

(e) Process for recommending a candidate for the position of Head of Department:

(i) The incumbent Head of Department shall commence the process of selecting the successor within three months to the expiration of the term.

(ii) Provided that the process under Item (i) of Paragraph 'e' clause shall be concluded not later than two (2) weeks to the expiration of the incumbent.

(f) Reasons for Removal

The Provost, Deans of Faculty, Head or Acting Head of Department and Units shall be removed from office by the Vice-Chancellor on the basis of any or a combination of the following reasons:

(i) Gross misconduct;

(ii) Lack of effective leadership;

- (iii) Indiscipline;
- (iv) Ill health;
- (v) Actions/Inactions that bring the name of the Department, Faculty or University into disrepute; e.g. engaging in examination malpractices; evidence of plagiarism; malpractices and abuse of office.
- (vi) 2 /3 Academic of staff signing a petition to the Dean;
- (vii) Fraudulent claims to academic qualifications including evidence of plagiarism;
- (viii) Involvement in fraudulent student admission practices;
- (ix) Wasteful and fraudulent use of the Department's resources;
- (x) Using his/her authority to physically and/or mentally harass students and staff;
- (xi) Corruption and mismanagement;
- (xii) Refusal to carry out the responsibilities as spelt out in the appointment letter.

(g) Procedure for Removal

The removal of any erring College Provost/Dean/Head of Department/ Director of Institute/Ag. Head of Department/Unit shall be made by the Vice-Chancellor based on the following procedures:

- (i) Upon receipt of a notice of vote of no confidence passed on any of the above officers by their relevant Departmental Selection Sub-Committee, Faculty Board, Academic Staff Assembly, Board of Fellows and Board of Trustees who were involved in recommending their respective appointment.
- (ii) The charges must be specific and unambiguous.

- (iii) The person alleged to have committed the acts of misconduct shall be given fair hearing.
2. That in the case of Clinical Department or Clinical Laboratory Department where a non-medically qualified person is appointed head, that Head of Department shall designate a medically qualified person as coordinator to supervise and coordinate clinical functions including Residency Training in the Department.
 3. That such a Head of Department shall recommend a suitably medically qualified person as coordinator through the Dean to the Provost for recognition and appointment by the University College Hospital (UCH) Management Board and the College.
 4. Normally the same person should not hold in a substantive capacity the post of Head of Department and Provost/Deputy Provost/Dean at one and the same time.

The following have, for the time being, been defined with regards to appointments of Heads of Departments in the College:

- a. Clinical Departments as those departments servicing patients care in UCH.
- b. Relevant Professional Qualifications as meaning possession of relevant post-graduate professional qualifications registrable with Medical and Dental Council of Nigeria in addition to basic Medical Degree, except for Nursing and Physiotherapy which have their own registrable qualifications.
- c. In the case of Clinical Laboratory Departments, however, a non-medically qualified person, who is a Member of the Royal College of Pathologists, would be regarded as possessing a relevant professional qualification if there was no suitable medically qualified person available.

Deans of Faculty of Medicine (1948-1980)

Name	Year	Department
Jolly, Beatrice M.	1948-49	Surgery

Prof. Juliana O. Taiwo	2020 - 2022	Perio. & Comm. Dentistry

HIGHLIGHTS OF PROGRAMMES

College of Medicine, University of Ibadan

a. Undergraduate Programmes

(i) MBBS.

In response to the needs of the nation, the College has endeavoured to maintain an annual student intake despite the severe cut-back in the funding of the University system in the country.

Our medical students in their fifth and final year are expected to spend a posting (of two months) in hospitals, health clinics, etc., outside the University College Hospital, Ibadan, the teaching hospital of the University of Ibadan. Such outside postings which are in addition to the traditional training in Community Medicine, using facilities provided by our Ibarapa Programme, have enabled the final year medical students to have an opportunity to be closely involved, under supervision, with delivery of health care not only in Ibadan environs but also in, the rural areas of Oyo, Ogun and Osun States. We are in fact bringing health care delivery to Nigerians in rural areas. It is hoped that the training under our present curriculum will produce the type of doctors who will be capable, keen and willing to serve in the rural areas.

(ii) BDS. (Dentistry Programme)

The College has progressed in the provision of clinical training in Dentistry since the B.D.S. Programme was commenced in 1975. A new administration block was commissioned on July 28, 2004 for the Faculty of Dentistry.

(iii) B.Sc. Programmes

The College has considerably expanded the B.Sc. Programmes in Nursing, Physiotherapy and Human Nutrition and Dietetics as well as the B.Sc. Honours degree programmes in Physiology, Biochemistry, Biomedical Laboratory Science and Environmental Health Sciences.

b. Postgraduate Training

The College of Medicine is intensifying and expanding its training programme to produce teachers in the basic medical sciences to enable the proposed new medical schools in the country take off. The establishment of the Institute for Advanced Medical Research and Training within the College should enable it play a leading role in integrating the facilities available in the College as well as in other institutions in the whole country, promote coordinated research germane to the needs of the country, and man power development.

The College, in collaboration with the Board of Management of the University College Hospital, has stepped up its residency training programme to produce specialists in the various disciplines in clinical medicine. More than 100 doctors are currently on the residency programme leading to the Fellowship Examinations of the National Postgraduate Medical College of Nigeria as well as the Fellowship of the West African College of Physicians and the West African College of Surgeons.

UNIVERSITY COLLEGE HOSPITAL, IBADAN

*“Time is like a dressmaker who specialises in alteration.
Undoubtedly UCH has gone through a number of metamorphoses”*

The University College Hospital Ibadan was established by an Act of Parliament in November, 1952 in response to the need for the training of medical personnel and other healthcare professionals for the country and the West African Sub-Region. The establishment of the Hospital was sequel to a Visitation Panel in 1951 to assess the clinical facilities for the clinical postings of medical students registered for the M.B.B.S. degree of the University of London. The visitation panel, led by Dr T.F. Hunt of the University of London rejected enhanced facilities provided by the Government/Native Authority Hospital at Adeoyo, Ibadan following the establishment of a Faculty of Medicine in the University College, Ibadan (now University of Ibadan) in 1948.

The Hospital is strategically located in Ibadan, then the largest city in West Africa which is also the seat of the first University in Nigeria. The physical development of the hospital commenced in 1953 in its present site and was formally commissioned after completion on 20th November 1957.

The Hospital was initially commissioned with 500 bed spaces but presently the Hospital has about 1,000 bed spaces and 180 examination couches. The current bed occupancy ranges from 70-80%.

The Hospital, at inception in 1948, prior to the Act of Parliament, had two Clinical Departments (Medicine and Surgery). However, the Hospital has evolved to accommodate about 60 Departments among which is the first Department of Nuclear Medicine in Nigeria, commissioned by the Honourable Minister of Health, Professor Eytayo Lambo on 27th April, 2006.

The Hospital and the University of Ibadan function in excellent symbiosis and it is impossible to think of one without the other, in the areas of health manpower training, research and clinical service. This functional interdependence was emphasized from inception through the appointment of the Chairman of the Provisional Council of the University College, (now University of Ibadan) Ibadan as the first Chairman of the Board of Management of the University College Hospital, Ibadan.

In addition to undergraduate medical programme (based in the College of Medicine of the University of Ibadan), the UCH also provides facilities for:- Postgraduate Residency Training Programmes in all specialties of Internal Medicine, Surgery, Obstetrics & Gynaecology, Paediatrics, Otorhinolaryngology, Ophthalmology, Anaesthesia, Laboratory Medicine, Psychiatry, Community Medicine, Family Medicine, Emergency Medicine, Radiology, Radiotherapy and Dentistry. The University College Hospital also provides diploma/professional programmes in the School of Nursing, School of Midwifery, School of Medical Laboratory Sciences, School of Health Information Management & Statistics, Environmental Health Officer's Tutors Course, Primary Health Care Tutors Course, Community Health Officer's Tutors Course, Nurse/Midwife/Public Health Nurse Tutors Course, Post registration courses in Nursing e.g. Peri-Operative Nursing and Occupational Health Nursing. Also, the Hospital has In-house Continuous Education Programmes for Nurses and Midwives in Administration and Management (CEPNAM), as well as Anaesthesia and Plaster Room Technician Training Programmes.

Governance Structure

The governance structure which consists of a Board of Management and a management team of the University College Hospital, Ibadan was established by an Act of Parliament No. 26 in 1952, with powers to formulate politics and provide supervisory control on the day-to-day administration of the Hospital. The act was amended by the University Teaching Hospitals (Reconstitution of Boards) Act No. 74 of 1979 which, six years later, was succeeded by the University Teaching Hospitals (Reconstitution of Boards,

etc) Decree 10 of 1985 which is deemed to have come into operation on 1st January, 1985.

Section 7 of the 1985 decree gives the Board wide powers “to do anything which, in its opinion, is calculated to facilitate the carrying out of its functions” and these include the duty to construct, equip, maintain and operate appropriate facilities for the instruction of medical students. Section 19 of the same decree interprets a medical student as a person whose course of instruction is designed not only to enable him qualify as a medical practitioner but which is also “designed for further training of medical practitioners.”

In its pursuit of these statutory duties, the Hospital's Board of Management had, since 1977, formally established a Residency Training Programme and determined the ground rules for its operations. In determining the rules and regulations governing the administration of the programme, the Board consulted widely with professional associations, postgraduate examining bodies nationally and internationally from groups and individuals, and the Department of Hospital Services in the Federal Ministry of Health, in order to ensure excellence in programme content and effective implementation.

Organogram of the University College Hospital, Ibadan

The organogram of the Hospital has a governance and management structure which divides the Departments into clinical and non-clinical. It also has a hierarchical structure which had at its apex the Federal Ministry of Health, followed by the Board of Management, then the Chief Medical Director. The Chairman, Medical Advisory Committee and the Director of Administration at par in that order. The evolution of various departments in the University College Hospital, Ibadan in line with the global trend in the health industry, has led to the proliferation of directorates that now assist the Director of Administration and the Chairman, Medical Advisory Committee.

Landmark Achievements

The University College Hospital, Ibadan was the first institution in Nigeria to produce sterile products for use of her patients. The production of infusion including intravenous fluids (i.e. normal saline, 5% dextrose, Hartmann's solution, dialyzing fluids – which were packaged in plasmosan bottles, smaller injections like Morphine sulphate, sodium bicarbonate, potassium chloride – which were filled in empty streptomycin and penicillin bottles), eye drops, nasal drops dates back to 1952 as stated in the 1953 handing over note of Mr. M. Ritchie who pioneered the Pharmacy Department of the University College Hospital, Ibadan. Mr. M Ritchie, a Briton was in charge of the then Western Region and worked at the Adeoyo Hospital. Mr. F.A. Callisto OFR, a Nigerian, was the first Superintendent Pharmacist to be employed from England to head the Pharmacy Department of the newly established University College Hospital, Ibadan.

With the advancement in technology, the use of bottles, rubber bungs and aluminium caps for the productions of large volume infusions could not be continued. However, the production of small volume infusions/injections e.g. sodium bicarbonate, potassium chloride, magnesium sulphate nasal drops have continued to date and this is unique to the Hospital's Pharmacy Department.

With the advent of the Public Private Partnership initiatives of the Federal Government, the Hospital is now in the process of producing large volume infusions e.g. normal saline using the latest technology of form-fill-seal technique using polypropylene materials.

In the 1960s', the work on cell cultures commenced in the World Health Organisation Centre for Immunology at the University College Hospital, Ibadan by an expatriate who handed over to the late Prof. Osunkoya who later handed this project to late Prof. Akin Williams who on retirement handed over to the late Prof. Salimonu. However, cell culture research stopped in 1981 because of lack of reagents and the poor financing of the health sector.

In the late 1970s', the Hospital pioneered open heart surgeries in Nigeria. More recently with the refurbishment of the operating theatres and

the Intensive Care Unit of the Hospital, the UCH reactivated open heart surgery with the successful performance of three open heart surgeries assisted by some colleagues from the United States.

Since 1994, UCH has been performing the transurethral resection of the prostate (TURP); and in 2005 organised the first national training workshop for all relevant cadres of staff in the country.

Between 1995 and 1996, the Hospital successfully carried out Charnley hip replacement and Johnson and Johnson knee arthroplasties. The Hospital acquired two adult arthroscopes four years ago; and to date 12 knee arthroscopic surgeries have been carried out successfully. Prof. Temitayo Shokunbi of the 'nail in the head' fame has also successfully commenced neuroendoscopic procedures in children with brain lesions.

The Nuclear Medicine Department, the first ever in the country, has commenced bone scanning services using radio-active pharmaceuticals. This service is available both for medical and oncological diagnosis and treatment. Diagnostic medical endoscopy of both upper and lower gastrointestinal tract have been done at the Hospital since the 1980s'. The Endoscopy Unit has broadened the scope with services that now include fibre optic endoscopy of the oesophagus, stomach, and duodenum and the rectum, sigmoid colon and the other proximal parts of the colon.

OTUNBA TUNWASE NATIONAL PAEDIATRIC CENTRE

Sagamu-Benin Express Road, Ijebu-Ode

The Otunba Tunwase National Paediatric Centre (OTNPC) was established in 2008 by Otunba (Dr) Michael O. Balogun, CON, a pioneer, role model, doyen of Nigeria's banking and financing industry under the aegis of the organization for his philanthropic endeavours, known as The Otunba Tunwase Foundation. The OTNPC was built on a fifty-acre piece of land along the Sagamu-Benin express way, which is accessible from all parts of the country. The Centre is secured by perimeter fence with one back access gate from Sabo area of Ijebu-Ode and two front access gates from the Sagamu-Benin express way. The Centre consist of five main buildings which included the main administrative/educational block, the Olori Omo-Oba apartments consisting of three units of accommodation and the functional Centre piece which is the hospital.

VISION

To be world class health care facility providing comprehensive qualitative and accessible health care services to all categories of patients in a friendly environment meeting the health needs of the society.

The Otunba Tunwase National Paediatric Centre, Ijebu Ode was conceived as a tertiary Medical Institution for teaching, research, and healthcare delivery. The hospital was solely built by Otunba Dr. Michael Olasubomi Balogun CON a philanthropist and doyen of Nigeria banking and Finance Industry. At the initial stage the hospital was a Paediatric Centre, however, the services have since diversified to include the following:

- Paediatrics
- Obstetrics & Gynaecology
- Surgery

- Internal Medicine
- Community Medicine
- Laboratory Services
- Radiological Services etc

MISSION

To continually improve and maintain services, training, and research at the health facility by:

- Producing a conducive environment for medical training and research for advancement of knowledge and production of health specialists.
- Building a team of competent, committed staff with high sense of responsibility, and integrity for the delivery of healthcare services.
- Provision of holistic, evidenced-based and patient centred clinical services with skilled medical and well-equipped paramedical support.

Presently, there is a memorandum of understanding between the University of Ibadan, the University College Hospital, Ibadan and the Donor to run the hospital.

SERVICE DEPARTMENTS IN THE COLLEGE

1. COLLEGE OFFICE (ADMINISTRATION)

The Registry in the College is made up of Units charged with providing services towards the day-to-day administration of the College. The Secretary to the College coordinates the units of the Registry which comprise the Academic, Human Resource and Development, General Services, Transport and all departments and units. All non-teaching staff comprising core administrators, the executive cadre, secretarial staff, clerical and office assistant cadres as well as non-technical staff are centrally deployed. The College Administration places emphasis on the training and development of staff through in-service programmes designed to enhance

their knowledge of best practices in higher education administration, relevant competencies, skills, and attitude to work.

2. FINANCE DEPARTMENT

The Finance Department is headed by the Financial Controller. The Financial Controller under the general control of the University Bursar is responsible to the Provost for the day-to-day administration of the financial affairs of the College. The Finance Department is saddled with the responsibility of receiving all income payable to the College and also making all payments in accordance with established rules and procedures. To carry out these functions, the Finance Department have the following sections and units:

- ü Financial Controller's office
- ü Grants Section

- ü Payroll Section
- ü Mandate Section
- ü General Ledger
- ü Reconciliation Section
- ü Cash Office
- ü Students Account
- ü Investments/Tax Sections

3. **E. LATUNDE ODEKU MEDICAL LIBRARY**

The E. Latunde Odeku Medical Library (ELOML) was established in 1966, primarily as a research library and as a part of the University of Ibadan Library System. The main objective of the Medical Library is to serve the information needs of staff and students of the College as well as the University College Hospital Ibadan. It is housed in a separate purpose built two storey building, that occupies an area of 25,000 square feet, which can seat approximately 180-200 readers. The stock comprising of clinical and other health sciences journals and monographs is about 49,000 volumes. The ground floor consists of the reading area, an electronic resource centre that has 25-30 computers connected to the Internet, and the reception and staff offices. The Medical Library has a basement that houses a SMART Classroom with over 50 computers as well as textbooks and back issues of

medical journals. There are six main units in the library as follows:

- Administration
- Acquisition, Cataloguing and Classification
- Circulation
- Reference and Information
- Serials
- Systems

Opening and Closing Hours, including vacation periods.

Monday - Friday - 8.00 a.m. to 10.00 p.m.

Saturdays - 8.00 a.m. to 1.00 p.m.

4. BIOMEDICAL COMMUNICATION CENTRE (BCC)

The Biomedical Communication Centre was established initially as Medical Illustration Unit in 1957 by Professor Alexander Brown with an initial staff of six among which were pioneer Heads of the unit Messrs. Diog Simmonds and Frank Speed. The overall objectives of the Centre include:

- i Teaching and training of the Public Health postgraduate students and faculty in audio-visual communication media and technology.
- ii Provision of media support services for teaching and research activities of the College of Medicine, the University of Ibadan and the University College Hospital, Ibadan.
- iii Design and production of quality visual and audio-visual materials to support medical teaching and training.
- iv Provision and deployment of media equipment for public lectures, seminars, workshops, film shows, etc.
- v Provision of Consultancy services and participation in media and communication related research activities with faculties, institutes and centres in the College and the University at large.

Apart from the already slated objectives, BCC also engages in the following services:

- Development of clinical instructional formats for academic programmes.
- Identifying, designing, and developing required specialized instructional media and materials.
- Installation and maintenance of communication media equipment

to support medical education and medical research.
The Centre has 5 functional units: Audio-visual, Maintenance and Servicing, Medical Illustration and Graphics, Medical Photographic, Multimedia Production and the recently added Instructional Development Unit.

5. ALUMNI RELATIONS OFFICE

The College Alumni Relations Office plays a crucial role in fostering and maintaining a strong connection between the College of Medicine, University of Ibadan, and its graduates and also partners with the Ibadan College of Medicine Alumni Association (ICOMAA). The primary goals of the Alumni Relations Office include:

1. **Building and Sustaining Relationships:**

- o Engagement: The office works to engage alumni by organizing events, reunions, and networking opportunities. This helps in building a sense of community and maintaining strong connections among graduates.
- o Communication: Alumni Relations Office manages communication channels to keep alumni informed about the latest developments at the institution, including updates, achievements, and upcoming events which are published in newsletters.

2. **Event Planning and Management:**

- o Reunions and Homecoming: Organizing reunions and homecoming events brings alumni back to the campus, promoting a sense of nostalgia and connection. These events also provide opportunities for networking and reminiscing.

3. **Data Management and Database Maintenance:**

- o Alumni Database: The office is responsible for maintaining an updated database of alumni contact information. This is essential for effective communication and outreach efforts. This also provides the platform for processing important documents for the alumni which includes Introduction Letters, Medical Student Performance Evaluation (MSPE) letters, statement of results, and other letters.

4. **Collaboration with Other Departments:**

- o Academic Departments: Collaborating with academic Departments helps in coordinating alumni involvement in

educational programmes, guest lectures, and other academic initiatives.

5. Feedback:

- o Gathering Feedback: The Alumni Relations Office seeks feedback from alumni to understand their experiences and expectations. This information can be valuable for continuous improvement.

6. IBARAPA PROGRAMME

History of Ibarapa Programme

The Ibarapa Community and Primary Health Care Programme was established in February 1963 to provide a learning setting and experience which would make medical and health science training at the University of Ibadan relevant to the needs and realities of Africa. At that time, it was the first of what has now become known as community-based and community oriented medical education and health services. The programme began and has remained a joint venture of the University of Ibadan (College of Medicine), the Oyo State Ministry of Health (formerly Western Region), the University College Hospital (UCH), the Local Governments in Ibarapa Division (Ibarapa East, Central and North) and, of course, the community. As such, the partners in this endeavour are the College of Medicine, University of Ibadan as the principal player and owner of the Programme together with the University College Hospital Ibadan, the Federal Government through the National Primary Health Care Development Agency, the Oyo State Government through the Hospital Management Board, and the Ibarapa Community. These stakeholders provide the members of the Management Board of the Programme chaired by the Provost of the College of Medicine. Initially, funding to establish the 43.605 hectares base campus came from the Rockefeller Foundation. Land was donated by the community around an existing State Government Health Centre which became the hub of operations. The mini campus, located in

Igbo-Ora, the largest of Ibarapa's seven towns and several villages and hamlets, is situated approximately 85 kilometres from Ibadan, the state capital.

Since its inception, Ibarapa has hosted 220 community health postings (rotations) of medical students (each of 6-8 weeks duration) from the University of Ibadan as of December 2020. Dental students of the university commenced an annual posting in Ibarapa in 2007. Masters and Diploma students from the African Regional Health Education Centre at the Department of Health Promotion and Education were regularly posted to Ibarapa for 3 months internship between 1978 and 2000. Community health officers in training at the University College Hospital have completed about 23 annual postings. Nursing students from UCH were posted regularly to Ibarapa in the 1970s. The UCH Schools of Midwifery and Peri-operative Nursing have been sending their students annually since 1987 and 2006 respectively. The Peri-operative Nursing School of the Obafemi Awolowo University Hospital, Ile-Ife also utilized the centre for the rural postings of their students. The School of Hygiene, Eleyele has used the place for the training and field experience of its community health extension workers since 1993. Elective students from America, Europe, Canada, the Netherlands, Britain, Finland, and other parts of the World come regularly to Ibarapa for the experience in community health and tropical medicine. The Director and Coordinator of Studies of the programme, resident doctors, environmental health specialists and health visitors assisted by visiting consultants and resident medical staff of the College of Medicine, University College Hospital and other research workers drawn from several departments in the College are responsible for teaching and supervision of the students. The programme is overseen by the office of the Provost through the Dean, Faculty of Clinical Sciences. Currently, plans are on ground to revise the programme to bring it up to date with where community-based and community-oriented medical education and health services are today as well as to regain the leading position it had at the onset. Virtually all the faculties and departments in the University of Ibadan are now involved in this, beginning with the Faculty of Agriculture and

Forestry, with all the departments there.

The Board of Management consists of the Provost, the Zonal Coordinator of B-Zonal office of National Primary Health Care Development Agency (NPHCDA), three representatives of the Oyo State Government, four representatives of UCH, seven representatives of the College of Medicine, six representatives of the Ibarapa Community and two representatives of the Ibarapa Programme.

7. CENTRAL ANIMAL HOUSE

BRIEF HISTORY OF CENTRAL ANIMAL HOUSE

Central Animal House is a service Unit, under the Faculty of Basic Medical Sciences, College of Medicine. It was basically established to provide experimental laboratory animals for both in-vitro and in-vivo research studies among students and researchers. Central Animal House is made up of two units namely; the Clinical Animal House on the UCH campus and the Pre-Clinical Animal House based at the main University campus. The technically trained staff of the units are involved in giving technical assistance to researchers, postgraduate and undergraduate students. These two units have served students and researchers involved in Biomedical studies. It had also extended its services to most science-oriented departments in the university, like Pharmacy, Pharmacology, Nutrition etc. Other institutions of higher learning outside the University and research centres also benefited from our services.

8. INTERNAL AUDIT

The Internal Audit unit is one of the Seventeen Resident Audit Offices/sections that report to the Director of Audit in the University of Ibadan. The Internal Audit Department in the University of Ibadan has a vital status with reporting standards to the University Council through the Vice-chancellor. The Unit has gone through many stages over the years with different sections springing up. The Internal Audit functions include but are not limited to:

- Ensuring various policies as put in place by the management are strictly adhered to and information required by the management to manage effectively is reliable and complete.
- Maintenance of adequate checks against fraud and misappropriation, concern with measuring and evaluating the continuous effectiveness of the internal control system;
- Examination and constant scrutiny of all systems of authorization of payments to ensure an adequate control of expenditure, periodic examination of internal checks to ensure the highest possible standards of accuracy and efficiency.
- Review of the economy, efficiency, effectiveness of operations and the functioning of non-financial controls.
- Review of accounting systems and related internal control, and implementation of corporate policies, plans and procedures.

9. AFRICAN JOURNAL OF MEDICINE AND MEDICAL SCIENCES

The African Journal of Medicine and Medical Sciences (AJMMS) unit came into existence in 1970 with its first publication in 1971 majorly to provide a medium for wide dissemination of information resulting from biomedical research in Africa and elsewhere. The founding editor was Professor A. Olufemi Williams while the Journal is jointly owned and published by the College of Medicine, University of Ibadan, and University College Hospital, Ibadan, Nigeria. It is a regular quarterly journal, publishing expertly reviewed articles in medicine and medical sciences, particularly those related to medical and health problems in Africa. The Journal receives articles on original research, review articles and case reports for publication from all parts of Nigeria, Africa, Asia, Europe and the Americas.

At inception, the Journal was published by Blackwell Scientific Publications, Oxford, England. This arrangement was discontinued after June 1991 and the College of Medicine, University of Ibadan and the University College Hospital, Ibadan, Nigeria, published the Journal. The Journal is undoubtedly regarded as the best journal emanating from Africa. The Journal remains a quarterly Journal but publishes supplementary issues. The list of such supplements includes a theme issue on Malaria, Bioethics, HIV/AIDS, Cancer in Africa and Biotechnology for Health and Development,

Objectives

The objectives of The African Journal of Medicine and Medical Sciences are:

- To provide a medium for wide dissemination of information resulting from biomedical research in Africa and elsewhere.
- To act as a channel whereby appropriate international medical and health organisations may transmit information to medical scientists throughout Africa.
- To serve as a medium for publication of proceedings of international conferences on medical sciences in Africa.
- To serve as a medium for the exchange of information and opinion among medical scientists in medical institutions of Africa and elsewhere.
- To promote inter-regional cooperation amongst medical scientists in Africa.

10. INFORMATION TECHNOLOGY UNIT (ITU)

INTRODUCTION

The College of Medicine, University of Ibadan, is the oldest medical school in Nigeria. It has highly skilled staff in various disciplines and is one of the most productive medical research institutions in Nigeria and in West Africa. However, Information and Communication Technology (ICT) was little developed in the Institution prior to 1998. Being in a developing country which has been experiencing severe economic problems for several years, there had been little funding for ICT. In 1998, there were some stand-alone computers in the College, some of which belonged to research projects and some of which were bought by the College for departments.

In 1998, during the tenure of Professor M. T. Shokunbi as Provost, a blueprint for ICT development in the College was drawn up. Dr. A. A.

Adeyemo, a Paediatrician and pioneer ICT committee Chairman (then known as the College Computer Committee) was a major contributor and a great mover. The blueprint called for a number of well-defined goals to be pursued. The goals included:

- (1) Establishment of an Information Technology Unit (ITU) to do system administration and implement ICT policy for the College.
- (2) Continued procurement of computers.
- (3) Networking of all computers in the College,
- (4) Obtaining Internet access for the College and
- (5) Setting up a College web site.

The E-learning platform was setup on a new server in order to create more space for the upload of academic materials on the platform.

11. COLLEGE OF MEDICINE EDUCATION UNIT (CMEU)

The College Management realized the central role of teaching effectiveness in the production of quality health care professionals and to this end had been in the forefront of organising programmes of induction, seminars, and workshops to achieve this objective. Following some programmes of induction of fresh academics and seminars on some aspects of teaching effectiveness, recommendations were received for the institutionalization of capacity building programmes in all aspects of teaching. The College Management while adopting this proposal further realized the need for setting up of a unit to co-ordinate the College activities in achieving this goal. Hence, the need for setting up of such a unit for strengthening of teaching effectiveness under the office of the Provost.

Therefore, the Academic Board of the College of Medicine at its meeting of Monday, 12 September 2011 considered the proposal for the establishment of the College of Medicine Education Unit and recommended its approval to Senate. Senate at its meeting of Monday, 10 October 2011 approved the establishment of the Unit.

Specific Objectives

Curriculum Development

- Implement and coordinate the new MBBS, BDS curricula and those being worked on (Human Nutrition, Nursing, Physiotherapy, and other single degree programmes).
- Ensure horizontal and vertical integration of the reviewed courses.
- Promote and become involved in innovations within the curriculum that reflect international best practices and lead to the University of Ibadan becoming recognized as a centre of excellence for its educational programmes.
- Organize formative and summative assessments of students and provide specialist advice on assessment.
- Ensure good record keeping of student's performances.
- Conduct periodic surveys on the effectiveness of the new curricula as well as develop a programme to evaluate the quality of teaching.
- Revise the various curricula when updates are available or request for new courses as demanded by stakeholders.

Staff Development/Capacity Building

- Identify needs of staff in the areas of teaching, course and curriculum planning, assessment and personal skills development in related areas.
- Organize seminars, workshops, retreats, for staff development and improvement in quality of teaching.
- Provide a role model of competent planning and delivery of training as well as inform staff about the Education Unit's role and activities and promote the availability of its services.

Collaborative Activities

- Coordinate links with other Departments in the University that will be involved with newly introduced courses.
- Develop effective relationships with the schools within the College and other Faculties.
- Establish effective interpersonal links with individuals, groups and organizations with an interest and/or responsibility for all aspects of undergraduate and postgraduate training.

Research

- To encourage and support the research activities of academic staff, all of whom will be expected to maintain productive and high-quality profiles of research through publications and presentations.
- To be successful in attracting funds for educational research within a philosophy which encourages a culture of seeking funding for projects with long term value and coherent with the research goals of the College of Medicine.
- To develop collaborative links with other research groups locally, nationally and internationally.
- To promote a programme of visiting lecturers to stimulate the creativity of local staff.

Activities

1. The Unit shall meet periodically to brainstorm, organize and plan different programmes to facilitate the achievement of its objectives. Such programmes may include: seminars, symposia, workshops, lectures, displays, on-line interactions etc.
2. It shall give periodic reports of its activities to the Provost who shall in turn report to the College Academic Board.
3. It shall seek the support of experts in the achievement of its goals.
4. It shall maintain an annual budget to be approved by the College Management.

Membership of the Board of the Unit

1. The Unit shall be headed by the Provost or his/her nominee.
2. There shall be one representative each from the MBBS, BDS, Physiology, Physiotherapy, Nursing, Human Nutrition and Biochemistry programmes.
3. Chairman, College Curriculum Committee.
4. Chairmen of all Curricula Implementation Committees.
5. Maximum of 6 trained/specialists in Biomedical Education within the College of Medicine.
6. Departmental Coordinators of all Departments and programmes.
7. The Head of the Academic Unit, COM.
8. A Representative from the Faculty of Education.

12. COLLEGE RESEARCH & INNOVATION MANAGEMENT (CRIM) UNIT

The College Research and Innovation Management (CRIM) unit acts as a central coordinating point for the management of research activities within the College of Medicine, University of Ibadan (CoMUI). The unit is primarily saddled with the business of management of sponsored research projects both locally and internationally funded with a vision to entrench a culture of research and innovation in the College of Medicine, University of Ibadan and a mission to facilitate institutional learning and collaboration in research through innovative management systems.

The Objectives of the CRIM unit are to:

- Assist researchers in navigating the grant process
- Facilitate linkages between researchers within and outside Nigeria
- Facilitate training and capacity building in research development and governance
- Provide technical assistance in all aspects of research proposal development
- Provide mentoring structures for early to mid-career researchers
- Set up and manage a phased bio-repository for College of Medicine,

University of Ibadan

- Monitor grants: pre-awards, post-awards and closeout of projects

CRIM's Advisory Board Members:

1	Prof. Eme T. Owoaje	- Dept. of Comm. Med.	- Chairman, CRIM
2	Prof. Adesola Olumide	- ICH	- Coordinator, CRIM
3	Prof. A. Ogunniyi	- Dept. of Medicine	- Member
4	Prof M.A. Gbadegesin	- Dept, of Biochemistry	- Member
5	Prof. Adeyinka Ashaye	- Dept. of Ophthalmology	- Member
6	Dr. A.O. Adebisi	- Dept. of Comm. Med.	- Member
7	Dr. O.C. Uchendu	- Dept. of Comm. Med.	- Asst. Coordinator I
8	Dr.Folusho M. Balogun	- ICH	- Asst. Coordinator II
9	Dr B. Kolude	- Dept. of Oralpathology	- Member
10	Dr Shade J. Akinsete	- Dept. of Env't. Health Sci.	- Member
11	Dr. R.O. Akinyemi	- IMRAT	- Member
12	Dr Micheal Obaro	- DCMAC Research & Ethics (UCH)	- Member
13	Dr. A.O. Abolaji	- Dept. of Biochemistry	- Member
14	Dr. S.A.Onasanwo	- Dept. of Physiology	- Member
15	Dr Foluso Atiba	- Dept of Anatomy	- Member
16	Dr O. O Dada	- Dept. of Physiotherapy	- Member
17	Dr M.O. Adewumi	- Dept of Virology/BMS	- Member
18	Mr. Olawole Olayemi	- Finance	- Member

This is the electronic Research Administrator system used by the NIH, it's an interface that allows grantees access to NIH grant information and other NIH research management process

- i Bio-repository
- ii Capacity building including training and mentorship
- iii Monitoring and Evaluation.
- iv Pre award, post award management of grants and grants close out
- v Research collaboration linkages.

CRIM Consultancy Services:

- i Development of project/research-based M&E framework and indicators
- ii Setting up research management structures
- iii Budgeting
- iv Proof reading & editing

CRIM Staff

NAME	DESIGNATION	QUALIFICATION
Fatimah Salami	Data/Information Officer	- HND Computer Science
Adenike Osiberu	Monitoring & Evaluation Officer	- B.Sc. Microbiology - MPH Health Promotion - Ph.D. Health Promotion & Education (in-view)
Babasanmi Osinkolu.	Research Administrator (Budget and Contracts)	- HND Statistics - B.Sc. Psychology - Professional Cert. in Supply Chain Management (Ec-council)
