(Role: Co- investigator)
- vx. 2022: Implementation research to leverage HIV community-level intervention for breast cancer prevention among females in Nigeria's informal work sector, Funder: Kiphart Global Scholar award of the University of Chicago (Role: Principal Investigator)

b. **In progress**

- i. 2020: Addressing the Hidden Burden: Development and Implementation of a Pragmatic University Mental Health Services Model in selected universities in South-West Nigeria  
Funder: Tertiary Education Trust Fund (TETFUND) National Research Fund, Nigeria  
(Role: Co-investigator)

This project aims to determine the burden of mental health challenges in selected universities in south-west Nigeria and evolve a pragmatic and holistic university mental health service that covers the spectrum of mental health promotion, prevention, early identification and treatment as well as supportive rehabilitation.

- ii. 2021: Assessment of Oncology Training Needs for Clinicians in Nigeria, **funded by** Kiphart Global Scholar In Medicine award of the University of Chicago, USA  
(Role: Co-investigator)

The goal of this study is to investigate the status of training in oncology practice and research for clinicians (Medical Doctors, Nurses and Pharmacists) in Nigeria and their training needs to inform the development of a tailored capacity building program. This will strengthen and sustain the capacity of academic and health institutions in the country for improved oncology care, research, and practice. The proposed research will adopt a convergent parallel mixed methods design. Data will be collected from clinicians in the six geopolitical regions of Nigeria using a semi-structured questionnaire and an in-depth interview guide.

- iii. 2023: Case Studies of Country-level Experiences on Multisectoral Actions for the Prevention and Control of Noncommunicable Diseases and Mental Health, Funder: Alliance for Health Policy and Systems Research, World Health Organization, Geneva, Switzerland (Role: Principal investigator).

The Federal Ministry of Health, Nigeria, in 2019 developed the National Multisectoral Action Plan (NMSAP) for noncommunicable diseases (NCDs) prevention and control, and evidence exists that the principle of multisectoral action was applied in the development of this policy. However, there is limited information on how and the extent to which this principle has been deployed in its implementation and monitoring of outcomes. This study aims to generate evidence on the application of multisectoral action for the implementation of the NMSAP for the prevention and control of NCDs in Nigeria.

- ix. 2023: Universal Health Coverage for Cancer Control– A Country-Level Analysis: a Lancet Commission on Cancer and Health Systems, Funder: Center for Global Health, University of Chicago, USA (Role: Site Principal investigator).

The widening inequality of cancer outcomes, both across and within countries has been documented. This reflects the inadequate capacity of health systems to provide care. This mixture of evidence highlights the importance of establishing a strong foundation for cancer control through effective universal health coverage (UHC), a task undertaken by most countries in the light of WHO's Sustainable Development Goals. The overall goal of this multi-country, case study is to critically appraise the health systems functions (stewardship, financing, service delivery and resource generation) for selected cancers across the continuum and recommend improvements to cancer care in nine countries (Nigeria, China, South Africa, Mexico, Peru, Argentina, Canada, and the United States of America).
